has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 1, 2008 has been entered.

EXAMINER'S AMENDMENT

10. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

11. Authorization for this examiner's amendment was given in a telephone interview with Mr. Theodore C. Shih (Reg. No. 60,645) on December 17, 2008.

12. The application has been amended as follows:

a. With regard to Claim 1, claim is amended as following:

Claim 1: A print system comprising:

at least two image data outputting apparatuses and one printer that prints images based on image data transferred from the at least two image data outputting apparatuses; and

control means that controls printing preparation of the recording sheet in the printer based on the transfer time, required for the transfer of the image data when the image data is transferred from each image data outputting apparatus, and a printing preparation time of printing preparation of the recording sheet for printing the images based on the image data; wherein

the printer is equipped with a plurality of trays at different positions, each of which houses recording sheets of different sizes;

printing start time is obtained that enables the time of completion of transfer of the image data and the time of completion of the printing preparation of the recording sheet to be at a substantially same time;

the printing preparation of the recording sheet is started at the above-described printing start time;

the at least two image data outputting apparatuses transfer identifying information regarding themselves when transferring the image data;

the printing preparation time for the each image data outputting apparatus is recorded in advance in the control means; and

the control means obtains the printing preparation time which corresponds to the identifying information transferred from the at least two image data outputting apparatus, and determines the printing start time based on the printing preparation time and the transfer time.

REASONS FOR ALLOWANCE

13. The following is an examiner's statement of reasons for allowance:

The instant invention is generally relates to a print system for printing images by a printer to which at least two image data outputting apparatus are connected and image data is transferred from each of the image data outputting apparatuses .

With regard to Claim 1, the closest prior arts of record, Takenaka (JP 10058798) does not disclose or suggest, among the other limitations, the additional required limitation of “...*the printing preparation time for the each image data outputting apparatus is recorded in advance*”

in the control means; and the control means obtains the printing preparation time which corresponds to the identifying information transferred from the at least two image data outputting apparatus, and determines the printing start time based on the printing preparation time and the transfer time". These additional features in combination with all the other features required in the claimed invention are not taught nor suggested by Takenaka.

With regard to Claims 2-6, the claims are depending from the independent Claim 1, each encompasses the required limitations recited in the independent claim discussed above.

14. Therefore, Claims No. 1-6 are allowed.

15. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
